KNOCK DOWN SYSTEM S

Is an improvement of the conventional eccentric cam fittings!

Instead of an eccentric cam house in zamak we have developed a steel barrel with a pointed grub screw, which is being wedged below the neck of the dowel ensuring a permanent grip

Replaces all 15mm diameter eccentric cam fittings without change of drilling, as the barrel requires the normal 34mm bore distance from the edge. Can also be supplied for 24mm and 44mm distance.

All parts are made of high quality steel. The material warrants unsurpassed anchoring properties and eliminates the risk of breakage of the fitting due to the constant high tension.

KD-SYSTEM S is available for 16 & 19 mm panels.

Tool for inserting KEA bushings::		
Item No.:	# 11.07.025	

"KEA" bushing for tables.

The perfect solution for coffee and dining tables.

THE "KEA" SOLUTION GIVES YOU THE POSSIBILITY TO TIGHTEN AND ADJUST YOUR TABLE LEG IN ANY POSITION DUE TO ITS **PATENTED** INTERNAL SPRING-LOADED SYSTEM.

With a traditional bushing you normally reach a point where you cannot turn in the hangerbolt any further. If you then have a square table leg that has to be flush with the edge of the table you have a problem. Only by heavy force you can try to turn your table leg further and risk that the wood cracks.

This will not happen with the "KEA" bushing due to its **patented** internal spring-loaded system.

"TWISTER" - LEG CONNECTOR

The "Twister" leg connector is designed for installing a leg in any position from 0 – 20 degrees – one way, simply by twisting the leg tightly onto the connector plate.

May be used on tables, cabinets, beds, sofas ect. wherever a leg is needed.

"Twister" gives the possibility to change the design on the furniture whenever there is a demand. Furthermore it may be used as a height adjuster/leveller in case of uneven floors.

Adjustable up to 40mm when changing the angle from 0 – 20 degrees. "Twister" is designed for maximum leg diameter of 50mm and M8 bolt.

The round sliding plate and body are made of black reinforced ABS.

The internal part is made of steel.

Danish design by SISO & Jesper Møller Hansen.

Pat. Pending in EU & US.

CATCH # 22

- high quality furniture fittings

Catch #22 is a patented version of the traditional table catch. This new model holds itself flat underneath the table top and spare leaves in both the locked and unlocked position.

Flat to base, even when unlocked - see picture A - D.

The old version always hung loose underneath the table and from spare leaves when not in use. This could easily cause damage to surfaces and edges, particularly on tables fitted with folding »butterfly« extension leaves and even to peoples' legs and clothing.

SURF

Quality furniture fittings

SISO DENMARK

BREAKING THE TRADITIONS

SURF

the new patented solution for connecting tables

The **SURF** table connector is the latest development of our table connector CLICK CATCH.

With the **SURF** we combine design with improved functionality. Not only does the **SURF** connect and hold the table leaves like the CLICK CATCH - it also pulls the table leaves together.

The **SURF** is mounted under the table top to connect tables by sliding the ellipse into the female part. When connected, you lock and tighten the **SURF** by closing the black plastic locking cap.

When not in use the ellipse is easily swivelled back under the table top, where it remains invisible and of no obstruction to knees! The female part, when not in use, works like a spacer for safe stacking of additional table leaves.

SURF PA6 – THE TABLE CONNECTOR

- high quality furniture fittings

The SURF PA6 table connector is the second generation of our table connector SURF. As the name indicates it is produced in polyamid material whereas the original SURF is made of zamak. The function is the same but due to the choice of material the price is more affordable. It is however only available in black color.

TABLE SPANNER "GRABS"

The "Grabs" is mounted under the table top to connect tables by pulling/strapping rubber band around connector hooks. The elastic rubber bands will pull and hold the table tops together. When not in use the rubber band is easily swiveled back and kept in place with an extra hook connector.

The rubber bands come in two lengths. The long 352 mm version is ideal for tables with frames where there is no space for a classic table top connector. The short 176 mm version is to be used on table tops without frame.
