## PRESENTATION

Our locks are mainly made of zamak and are as standard supplied with 6 wafers, giving 400 different key combinations. **Master key system** and **Interchangeable Cylinders** are also available.

Some models are available with laser cut "Snake" keys, granting 1000 key combinations. Keys are made of solid brass material. Some models have brass pins & tubular keys, granting 2000 key combination.

All locks are supplied as standard with 1 rosette and 2 double dented keys, marked combination numbers.

Keys are as standard supplied with black nylon cover, and can also be supplied as "**hinged**" type. However the keys may also be supplied all metal.

Optional: Locks may be supplied with key combination number already prestamped on the cylinders. Locks with **Master key & Interchangeable system (MIC)** are as standard supplied key combination number already **prestamped on the cylinders**.

You may ask for your own designed key and logo. Only you have to order minimum 10,000 keys (= 5000 locks of different models).

### ABBREVIATIONS/SYMBOLS

K/A	=	<i>Key Alike (all locks same key code)</i>
K/D	=	<i>Key to Differ (all locks different key code)</i>
NPL	=	<i>Nickel Plated</i>
BPL	=	<i>Brass Plated</i>
CPL	=	<i>Chrome Plated</i>
ALU	=	<i>Matt Chrome</i>
BRZ	=	<i>Bronze Plated</i>
BLK	=	<i>Black Anodized</i>
Backset	=	<i>Distance from centre of key entrance to the edge of the lock, where the locking tongue protrudes.</i>
M	=	<b>Master Key System.</b> We offer 5 different Master Key groups named: J-11, J-12, J-13, J-14 or J-15. The groups J-11 and J-12 are stock items. Other groups require a certain delivery time. <b>Master keys</b> are covered with <b>white nylon</b> and marked with Master key Group number, f.inst. J-12. This master key can open all 400 different key combinations in this group.

**MIC** = *Master key & Interchangeable Cylinder*. Apart from a few models, most of our locks may be supplied with MIC system. Keys for changing the cylinder is covered with red nylon.

#### ADVANTAGE of MIC:

- 1) **Security:** You can install the cylinders or change same to desired key combination at the final location. This offers additional security against unauthorized opening.
- 2) **Comfort:** It is easy to change cylinders without having to dismantle or change the lock already installed. In case of lost keys you can open the furniture either with the master key or you can take out the cylinder with the red key and replace it by a new cylinder. Insertion of loose cylinder into the lock body out any additional accessories – just the red key.

All MIC Locks are supplied with master key system as standard and cylinders are marked key combination number.

MIC locks are supplied with fixed cylinders or you can have empty lock bodies only and buy the cylinders separately, either as key alike or key to differ. If you buy lock bodies only, our locks are supplied a nylon plug inside the cylinder housing. The plugs have different colours:

Drawer position:	blue colour
Right position:	black colour
Left position:	red colour

The plug prevents the cylinder housing from being damaged and you just remove the plug and insert the cylinder in this lock position.

## Installation of cylinder into an empty lock body

1. Make sure that the arrow on the plastic plug points towards the lock tongue. If not in the correct position take a flat screw driver and turn the plug to the right position.
2. Take out the plastic plug from the lock body.
3. Take off the transparent plastic tube from the cylinder.
4. Insert the loose cylinder into the empty lock body right to the end.
5. Turn the key 90° & draw the key.
6. The cylinder has successfully been installed.

## SETTING YOUR OWN COMBINATION

Your new resettable combination padlock is preset to open at 0-0-0-0, even though dials may be positioned at other numbers.

- Step 1:**  
Turn the dials and align the numbers to preset combination 0-0-0-0 so they are clearly visible inside the 'windows'.
- Step 2:**  
Pull out the shackle.
- Step 3:**  
Turn the shackle counterclockwise 90°.
- Step 4:**  
Press the shackle down all the way, hold it firmly and turn the dials to your own desired combination. Do not let go of the shackle before completely setting the desired combination.
- Step 5:**  
Release the shackle and return it back to the original position. Your new personal combination is now ready to use. Keep your combination in a safe and accessible place for future reference.

## HOW TO CHECK THE MISSING COMBINATION

When forget the number, you can use Master Key to open the lock and decode the number.

- Step 1:**  
Use the Master Key.
- Step 2:**  
Turn the key 90° clockwise to open the lock and release shackle.
- Step 3:**  
Rotate the dials, till it stop (do this process for all dials).
- Step 4:**  
Then you got the previous setting combination.
- Step 5:**  
After you found the opening combination. Please remember to close the cab then take out the key. The lock can be used again.

Technical drawing of a rectangular plate. The top view shows a rectangle with overall dimensions of 50 mm (width) and 38 mm (height). A central rectangular hole has a width of 22 mm and a height of 7 mm. A circular hole, labeled 'Screw 3 mm', is located on the right side of the plate. The bottom view shows the plate from below, with the same dimensions and a central rectangular hole of 22 mm width and 7 mm height. A circular hole, labeled 'Screw 3 mm', is located on the left side of the plate. A vertical dimension line on the right side indicates a distance of 7 mm from the top edge to the center of the screw hole.

The diagram shows a cantilever beam of total length  $L$ . At the free end, there is a semi-circular notch. The notch has a radius of 5 mm and a diameter of 6 mm. The beam is fixed at the other end.
